## **American Heart Association Basic Life Support for Healthcare Providers (CPR)**

The BLS for Healthcare Providers course is designed to provide a wide variety of certified or noncertified, licensed or non-licensed, healthcare professionals with the skills to keep people alive until they can be brought to a hospital or be treated with more advanced lifesaving measures.

This is a classroom-based course, in which healthcare professionals learn to recognize several life-threatening emergencies, provide CPR to victims of all ages, use an AED, and relieve choking in a safe, timely and effective manner.

Students must pass a written exam and skills test in order to qualify for a BLS for Healthcare Provider Course Completion Card.

The course length is approximately 5 hours; class size is limited to 8 students per instructor.

**Recommended Textbook: American Heart Association Basic Life Support (BLS) for Healthcare Providers Student Manual available in the UA Rich Mountain Bookstore.**

Instructor: Amanda Page

Location: Maddox Building, Room 102 (Nursing Classroom)
