BIOLOGICAL SCIENCE, BIO 1543-Lab02
Spring 2020

Class Time and Location: W 2:00PM – 4.00 PM in Spencer 229
Instructor: Krishna Nath, Ph.D., M.Sc., B.Ed.
Office and Contact Information: Spencer 238; Phone 394-7622 ext 1336
Office Hours: Posted on the office door
Email: knath@uarichmountain.edu

Resources:
Laboratory Manual: *Exploring Biology in the Laboratory*, Custom ed; Pendarvis and Crawley.
ISBN-13:9781617313271

COURSE DESCRIPTION: This course provides a study of fundamental biological concepts including terminology, structure and function, genetics, evolution, classification, processes and characteristics unique to living organisms. It is designed to introduce the principles of biology and will provide the necessary foundation for those desiring additional course work in the field of biology and health sciences. Laboratory is an integral part of this course and participation is required for successful completion of this course. **ACTS COURSE: BIOL1014**

PROGRAM OUTCOME and Rationale: The purpose of the Associate of Arts Program is to provide students with the knowledge and critical thinking skills that will enable students to analyze problems, arrive at intelligent conclusions, and make reasoned choices in their professional and personal lives.

- Students will demonstrate an understanding of physical and biological principles.
- Students will apply technological and research skills to identify, locate, and process information.
- Students will demonstrate competency in writing, reading, speaking, and listening.
- Students will be able to compete academically upon transfer to a four-year institution.

COURSE OBJECTIVES: Upon successful completion of Biological Science, the student should be able to:

1. Identify the characteristics of life and the theory that explains the unity and diversity of these characteristics.
2. Utilize the steps of the scientific method in biological problem solving.
3. Describe the relationship between Science and Technology.
4. Competently use a light microscope and computer technology to research biological information.
5. Review the components of a typical cell to their function in the cell.
6. Describe the importance of chemistry and biological molecules to metabolism.
7. Compare the chemical reactions of photosynthesis and cellular respiration including where there occur.
8. Distinguish between mitosis and meiosis including their role in the life cycle.
9. Discuss the role of DNA replication and protein synthesis.
10. Explain the importance of Genetics to the theory of evolution.
11. Define species and describe in a general way the process by which speciation occurs.

12. Describe the typical structure of vascular plant anatomy
13. Identify the different organ systems and their functions in the human body.
14. Define ecology identifying its importance to society.

Disclaimer: The information contained in this syllabus is as accurate as possible but may be subject to change with reasonable advance notice. The schedule and content of lectures and assignments may be changed at the discretion of the instructor upon oral notification in class. Changes may involve additions, deletions, substitutions, or changes in sequence or due date.

Table: Tentative Lab Schedule

Date	**Lab topic and assignment**	**Unit**	**Procedures**
January 14	The Metric System	2	2.2, 2.3
January 21	Microscopy	3	3.1, 3.2, 3.3, 3.4
January 28	Cell Structure and Function	6	6.1, 6.2, 6.3, 6.4
February 4	Diffusion and Osmosis	8	8.1, 8.2
February 11	Photosynthesis	9	9.3, 9.1, 9.2, 10.3.2
February 18	Cellular Respiration	10	10.1, 10.3.2
February 25	Cell Division/ Mitosis and Meiosis		
March 3	The Scientific Method	1	1.2
March 10	Basic Mendelian Genetics ***(1st Formal Laboratory Report Due)***	13	13.3, 13.4, 13.5, 13.6
March 17	DNA and the Genetic Code	14	14.1, 14.2
March 31	Evolution	15	15.1, 15.2, 15.3, 15.4, 15.5
April 7	Population Genetics	13	13.1, 13.2
April 14	Ecology	37	37.1, 37.4-3&4
April 21	Embryology (work on Lab Report)	35	35.1
April 28	OPEN LAB, ***(2nd Formal Laboratory Report Due)***	-	-

LABORATORY CONDUCT: The laboratory consists of a series of hands-on exercises that are designed to reinforce some of the principles covered in lecture. Labs will also introduce the student to some common laboratory equipment and Good Laboratory Practices. Students are expected to follow the instructor's direction and comply with the Rules of the Laboratory. Lab exercises are assigned beforehand and it is expected that you **read the material BEFORE coming to class**. Labs are designed to be investigative and will require critical thinking skills to analyze results of experiments.

UARM CREDIT HOUR CALCULATOR: For every course credit hour, you should expect to spend at least three clock hours per week of concentrated attention on course-related work, including but not limited to time attending class, as well as out-of-class time spent reading, reviewing, organizing notes, preparing for upcoming quizzes/exams, problem solving, developing and completing homework, and other activities that enhance learning. For a three-hour course, a typical student should expect to spend at least nine hours per week dedicated to the course. This includes the time spent in class.

Course Requirements / Evaluation (Grading) for Lab

Lab activities and quizzes:	12 @ 10 points each	= 110 points (one lowest will be dropped)
Formal Lab Report	2 @ 20 points	= 40 points
Total points		**= 200**

GRADING SCALE:
The final grade for the course will be determined by dividing the student's total number of points earned by the number of possible points. Grades are assigned on the basis of the following percentage scale, after rounding the calculated percentage to the nearest whole number:
Table 2. Grade Scale.

Percentage	Final Grade
90-100	A
80- 89	B
70- 79	C
60- 69	D
<60	F

Lab Activities: Tentative dates are given in the syllabus for respective topic. Students are required to attend in each Lab and perform all the lab activities including offered Lab Quizzes and Lab Reports.

LAB QUIZZES – Approximately 12 quizzes will be given throughout the semester during laboratory periods and lowest one will be dropped off. The quizzes will consist of questions related to laboratory exercises performed, assigned readings, and related lecture information. These quizzes will be administered in class, and in some cases your lab work will be turned in in lieu of the quiz.

LABORATORY REPORTS – Two formal laboratory reports will be submitted during the semester. These will be a summary report over one of the exercises performed in the lab. An outline will be provided when assigned. **Completion of a lab report is a course requirement for successful completion of this course.**

ATTENDANCE REQUIREMENTS: As a student, you are responsible for all material presented during lecture, whether present for the class or not. Assignments are to be completed in a timely fashion; therefore, all make-up work must be completed within 5 calendar days of your return following an absence. Unexcused absences are not to exceed twice what the class meets in a week. Laboratory is a required part of this course and failure to attend or participate **will** result in an "F" for this course. For further information, see "Student Attendance" on page 70 of the 2017/2018 UARM Academic Catalog.

Make-up Policy: A student who misses an assignment because of an officially sanctioned college activity or those with a documented excuse for their absence, will be permitted to make up the assignment or test without penalty. Others may also make up missed exams but will be penalized 20% for each occurrence. Any deviation from this policy will be considered on a case-by-case basis.

Additional Information: Food and drinks are not permitted in the laboratory. Please make sure that your cell phone and any other electronic devices are turned off (or to a non-sound mode) during the class session. **Place all such devices out on the desktop**.

Disability Policy: It is the policy of UARM to accommodate students with disabilities, pursuant to state and federal law. Any student with a disability who needs accommodations should contact the Vice President for Student Affairs Office, 394-7622 ext.1400.

Arkansas Clean Air Act: In compliance with the Arkansas Clean Air Act, UARM is a smoke and tobacco free facility. Students are to refrain from the use of all tobacco products while on campus.

Student Misconduct: Students committing misconduct are subject to disciplinary sanction(s) and or restrictions. Misconduct or prohibited behavior includes, but is not limited to endangerment, harassment, disruption, sexual misconduct, dishonesty, illegal drugs and/or alcohol, fire or safety issues, gambling, property violations, computer violations or other violations as listed in detail in the UARM catalog.

UARM Mission: University of Arkansas Rich Mountain exists to provide all residents of the Ouachita Mountain Region with exemplary educational and enrichment opportunities to improve the quality of life and standard of living.

Campus Security: UA Rich Mountain strives to provide a safe learning environment; therefore, students who know of any security risk are asked to contact a college official. For more information follow this link and look under Health and Safety: http://www.uarichmountain.edu/at-a-glance/disclosures
