Course Syllabus
University Chemistry I (CHM 1103)
Fall 2023

Class Time and Location: MTWRF 11:30-12:20; every other R 9:05-9:35 Mena High School room 312

Instructor Name: Mr. Rodney Rowland

Office Location: Mena High School room 312

Office Hours: 1:50-2:40 MTWRF

Office Phone and Email: 479-394-1144; rodney.rowland@menaschools.org

Prerequisite: Successful completion of 1 1/2 units of high school algebra, OR corequisite MTH203, or permission of instructor

Resources: 1) Textbook: Chemistry, Eighth Edition, by Steven S. Zumdahl. Lexington: D. C. Heath and Company, 2010. *ISBN 978-0-547-12532-9* 2)

Course Description: This course is three credit hours and is designed to provide the basic chemistry background necessary for science majors such as physics, chemistry, biology, biochemistry, and engineering. The fundamental theories of chemistry taught in this course include measurements, periodic law, atomic theory, stoichiometry, thermochemistry, chemical reactions, and bonding. Laboratory course CHEM 1101L must be taken concurrently with this course to earn four credit hours.

Program Outcomes: The knowledge and critical thinking skills acquired in the general education component enable students to analyze problems, to arrive at intelligent conclusions, and to make reasoned choices in their professional and personal lives. Students will also:

- Use analytical and reasoning skills to solve practical problems based on structure-property relationship
- Develop critical thinking and research skills based on basic laws of nature and chemistry

Rationale: Through the study of chemistry, problem solving experiences, and laboratory activity, the student develops an understanding of matter and the laws that explain the interactions between matters, including the energy changes involved.

Course Objectives: Upon completion of General Chemistry I, the student should be able to:

1. Make a variety of measurements using the Systeme Internationale (SI) units.

2. Use dimensional analysis to convert units as well as to solve problems in general.

3. Demonstrate a working knowledge modern atomic structure and how it relates to the periodicity demonstrated by the elements on the Periodic Table.

4. Name and write the equations for ionic and covalent compounds, and balance equations involving these compounds.

5. Perform chemical calculations involving the amount of reactant and product.

6. Demonstrate a working knowledge of the different types of chemical reactions.

7. Balance oxidation-reduction equations.

8. Demonstrate a working knowledge of the composition of solutions and the reactions that take place in solution.

9. Mathematically and conceptually demonstrate a working knowledge of gases and the gas laws.

10. Demonstrate an understanding of equilibrium.

11. Demonstrate a working knowledge of energy changes in chemical reactions including: enthalpy, calorimetry, and Hess's Law.

12. Demonstrate a working knowledge of electron structure including: spectral evidence, the Wave Mechanical Model, and the Aufbau Principle.

13. Demonstrate a working knowledge of Chemical bonding including: ionic and covalent bonding, bond polarity, Localized Electron Model, Lewis structures, resonance, VSEPR Model, Molecular Orbital Model.

14. Describe the phases of matter and the structural and physical properties associated with these phases and the changes between phases.

Topical/Unit Outline:

I. Chemical Foundations:
A. Systeme Internationale
B. Conversion Factors
C. Scientific Notation
D. Significant Figures
E. Graphing
F. Density
G. Classification of Matter

II. Atoms Molecules and ions:
A. Fundamental chemical laws
B. Early Atomic Models
C. Development of the modern atomic model
D. The periodic Table
E. Naming Simple compounds

III. Chemical Reactions
A. Balancing Chemical Reactions
B. Four basic types of chemical reactions
C. Acid Base reactions
D. Oxidation Reduction reactions

IV. Stoichiometry:
A. The Mole Concept
B. Molecular mass/weight
C. Determining the formula of a compound
D. Percent composition
E. Stoichiometric calculations
F. Limiting Reactant concept
G. Stoichiometry of Precipitation and acid base reactions
H. Solution Concentration: Molarity
I. Net Ionic Equations and Representations

V. Gases:
A. History of gas laws
B. Ideal gas laws
C. Gas stoichiometry
D. Kinetic Molecular Theory of Gases
E. Real gases

VI. Liquids and Solids
A. Intermolecular forces
B. Solid structure and density
C. Vapor pressure
D. Phase diagrams

VII. Thermochemistry:
A. Enthalpy and Calorimetry
B. Hess's Law
C. Standard enthalpies of formation
D. Entropy
E. Gibbs' Free Energy

During the semester, due to unforeseen circumstances, it may be necessary to add to or delete contents from this document. This will only be done with adequate notification to the students affected.

Course Conduct: The class will be taught using a combination of lecture using *Powerpoint* presentation, solving in-class questions, demonstrations, group discussions, and performing

laboratory experiments. Students are strongly encouraged to discuss concepts and examples as opportunities are presented during instructor presentation.

UA-Rich Mountain Credit Hour Calculator: For every course credit hour, you should expect to spend at least three clock hours per week of concentrated attention on course-related work, including but not limited to time attending class, as well as out-of-class time spent completing homework, seeking help from instructor or tutors, preparing for upcoming quizzes/tests/exam, reviewing material, problem solving, and organizing your notebook. For a four hour course, a typical student should expect to spend at least twelve hours per week dedicated to this course. This includes the time spent in class. Please see the credit hour calculator information attached to end of syllabus.

Course Requirements/Evaluation: Students will have one to two homework assignments to complete per week of class. Students will also have multiple choice/open response quizzes on a weekly basis. Exams will be administered after the completion of a unit (normally two chapters). The following is how much weight each category carries toward the final grade by percentage.

Exams: 35%
Quizzes: 25%
Homework assignments: 26%
Final Exam: 14%

Final grades will be assigned on the basis of standard grading percentage scale:
90-100 **A**
80- 89 **B**
70- 79 **C**
60- 69 **D**
0- 59 **F**

Class Procedures/Student Requirements:

Attendance Policy: Students enrolled in concurrent courses are expected to attend and participate in class just as traditional college students must. In order for students to be fully engaged and prepared for university entrance upon graduation, students who choose concurrent courses during high school must not have excessive absences. Students who have more than six absences in a class per semester can lose their concurrent credit for that course. It is important that students communicate with their teachers ahead of class time. Students who communicate with their teachers prior to their absences and turn in their assignments on or before the assigned due date will not be considered excessively absent. School sponsored events will not count toward the students' absences. (See Board Policy 5.22). In case of extended illness, or other circumstances, the student must contact the instructor if a WP is desired. If the instructor is not notified a failing grade will be assigned for the course.

Cell Phone Policy: Students will follow the policy outlined in the MHS student handbook.

Make-up work policy: Make up work should be competed promptly after the absence. Students will adhere to the MHS student handbook for make-up work deadlines.

Assignment due dates: Students are expected to submit the assignments and other works on or before the assigned due dates. You will be penalized for the late works depending on the number of days.

Academic Dishonesty: It is expected that each student shall do his/her own work on class works, quizzes, exams, and lab reports. Cheating, copying other's answers, writing other's statement without citing their reference are all considered plagiarism and are penalized from allowing no point in that particular unit up to dismissal from the whole course, depending on the severity of the offense.

Disability Policy: It is the policy of UA-Rich Mountain to accommodate students with disabilities, pursuant to federal law, state law. Any student with a disability who needs accommodations should contact the Associate Vice President for Student Affairs Office at 394-7622 ext. 1460.

Arkansas Clean Air Act: In compliance with the Arkansas Clean Air Act, UA-Rich Mountain is a smoke and tobacco free facility. Students and guests are to refrain from the use of all tobacco products while on campus.

Student Misconduct: Students committing misconduct are subject to disciplinary sanction(s) and/or restrictions. Misconduct or prohibited behavior includes, but is not limited to, endangerment, harassment, disruption, sexual misconduct, illegal drugs and/or alcohol, fire or safety issues, gambling, property violations, computer violations, or other violations as listed in the UA-Rich Mountain catalog.

UA-Rich Mountain Mission: UA-Rich Mountain exists to provide all citizens of the Ouachita Mountain Region with exemplary educational and enrichment opportunities to improve the quality of life and standard of living.

Title IX and Discrimination Policy: UA Rich Mountain adheres to a policy that enables all individuals regardless of race, color, gender, national origin, age, religion, sexual orientation, veteran's status, or disability, to work and study in an environment unfettered by discriminatory behavior or acts. Harassment of an individual or group will not be condoned, and any person (student, faculty, of staff member) who violates this policy will be subject to disciplinary action.

Harassment that is considered discriminatory includes actions or conduct (verbal, graphic, gestural, or written) directed against any person or group with the intent to demean or create a hostile or threatening environment. It is not the intent of this policy to infringe upon or limit educational, scholarly, or artistic expression. Any person who believes he or she has been discriminated against should contact the Title IX Coordinator to obtain assistance and information concerning the filing of a complaint.

Week #	**Proposed Schedule of Topics/Activities by book section #**
1	Discuss syllabus; Chemical Foundations
2	Chemical Foundations, Atoms, Molecules, and Ions
3	Atoms, Molecules, and Ions; Percent Composition, Empirical Formula (Labor Day, 9/5)
4	Exam 1; Balancing and Stoichiometry
5	Stoichiometry; Types of Chemical Reactions
6	Solution Stoichiometry
7	Solution Stoichiometry
8	Exam 2; Gas Laws
9	Gas Laws
10	States of Matter
11	States of Matter
12	Exam 3; Thermochemistry
13	Thermochemistry
14	Thermodynamics
	THANKSGIVING HOLIDAY MONDAY (11/20) -- FRIDAY (11/24)
15	Thermodynamics
16	Exam 4; Final Exam
