UA Rich Mountain
Assessing Student Learning
Course Outcomes Report
Robby Burt
Fall 2019

Purpose
The Course Outcomes Report supplies information each semester regarding student learning on the course level. This report must be submitted to your division chair by the last day of the semester. Data from this report will be integrated into the annual Program Outcomes Report on Student Learning.

Background
Course Name: Oral Com Course # SPC 203

Course Outcome(s) being assessed this semester
Think of the evidence of student learning activity or project. Choose ONE outcome for this course.
Students should be able to research their topic.

Related Program Outcome: Program Outcome: Students will apply technological and research skills to identify, locate, and process information.

Related GELO category: Research and organizational skills.

Evidence of Student Learning
Describe the classroom activity/tools related to **course** objective (What did they do for the class which was tied to this objective? Was it a project? Discussion? Quiz?)

Describe Activity: Students have a library scavenger hunt given to them on the first day of class, and they have until the fifth week of classes to find the answers through using the library databases. Students use proquest, Ebsco, Proquest E-book, the library catalogue, and reference material to complete the 75 question project. Students can access the information at home, or at the library. Students take a tour of the library, and have the librarian show them all of the necessary databases to access information.

Reflection
A. What was the result of this activity? (How do you know that students satisfied the course objective being measured?)

The students worked on this activity a few times in class to get the help they needed, some of the students worked early on the assignment and spent time in the library to complete the project on time. Some students were able to work on the project at home. A majority of the class has become better researchers due to the exposure of our library and databases.

B. Enter course data
Number of students in your course(s) who met course objectives: Fifteen out of twenty one passed the activity (71.4%), and two out the twenty one did not make an attempt to complete the project .

Enter the number of students total in your course section(s): 21

Enter the percent (%) of students achieving this course objective. (Data will be used on Program Outcomes Report under Evidence of Student Learning.) 71.4%

C. Response to data: Will you change how you teach as a result of this assessment?

Choose only one of the narration options below. If curricular changes are needed, briefly explain any changes planned for course improvement. If no changes are needed, indicate the rationale in the space provided below.

☒Changes(s) needed. Need a way to improve the score of the other 28% of the class.

☐No change(s) needed

****Attach anonymous student samples of each activity along with the grading rubric / scale.**
