**Fall 2020 KNath BIOL2013-01 Course Comments**

Any additional comments about the course or instruction?

This Class was easy to maintain and the Course information was really clear and understandable

He is a nice man and concerned with student progress, but this class felt like an afterthought. He was unprepared/did not have the supplies for labs. Most of lecture was him reading straight off the PowerPoint. I felt that I had study double

I believe I would have understood the material more, Alot more, had I'd been able to understand my instructor. Not being able to understand his language really made this class hard & unbearable
