MLA Formatting
*Citing Digital Sources*

**Remember:** Always check Purdue OWL for MLA Formatting Tips.

General Reminders:

- *Online publications should have 2 dates*
    - The date of publication AND
    - Access date
- *Online magazine articles should have BOTH the publication name AND the publishing company; they may or may not be the same.*
- *You are to include the URL to the article IN the citation* (be mindful of WHERE it goes).
- *Always use a hanging indent.* The easiest way to apply a hanging indent is to highlight the citation and use the ruler above.
- The title included at the top of a Work/s Cited Page should be labeled accordingly:
    - For ONE source, use **Work Cited**
    - For MORE than one source, use **Works Cited**

Each of these sources is considered "An Article in a Web Magazine" (which includes online articles on news websites). View formatting guidelines on the Electronic Sources Page.

Create a correct MLA citation for each of the articles below in the spaces in the boxes that follow (No formatting is included in the titles; they are strictly links.).
