4. Evidence of Student Learning

Describe the classroom activity/tools related to **course** objective (What did they do for the class which was tied to this objective? Was it a project? Discussion? Quiz?)

Describe Activity: Students were given a pretest at the beginning of the semester and the same test at the end of the semester. The results were compared. Students also made presentations throughout the

semester. The improvement in student performance and material presented demonstrated growth more than the pre- and posttest.

5. Reflection

A. What was the result of this activity? (How do you know that students satisfied the course objective being measured?)

At the beginning of the semester, 12 students completed the quiz with an average score of 49%, There were only 2 students who score above a 70% on the pretest. At the end of the semester, 10 students took the quiz with an average score of 68.13%. There were 5 students who scored above a 70% on the posttest.

Student performance increased. Of the 11 students who presented the final speech, all but 2 students had incorporated effective introductions and conclusions into their speeches and only 3 were short of the required time by less than 30 seconds.

6. Enter course data
