KNath BIOL2013-01 Sp22

Any additional comments about the course or instruction?

Good guy, but very hard to understand, and was kind of confused the whole class especially durin labs. Lack of communication.

I feel there was a lot of miscommunication and confusion. The lack of understanding the lectures and lab assignments made the class more difficult. Seems like a really nice man though just have trouble understanding

It was really hard to understand him and you can't really learn much when you don't understan what somebody is saying... great instructor though just needs a little improvement on english!

I believe Dr. Nath is passionate about his subject however, his accient is a major problem. I honestly cannot understand 80% of the things he says and it severely damaged my learning experience.

Hes a little hard to understand at time: other than that great.

The lab instruction and preparation were not always present. When entering labs, students are often confused and perform the lab wrong. I didn't get much out of the lab section because of lack of preparation and guidance.

Very hard to understand instructor, therefore was difficult to learn content.

When we have homework or a report to explain exactly what he or she want us to do.

very hard to understand instructor at times, also, felt like expectations were not communicated well. Lab never felt prepared for ½ often no instructional supervision was provided.
