Any additional comments about the course or instruction?

Mrs. Crystal is an auditory learner and teaches that way. The examples decreased and the verbal explaination increased, which was not a helpful learning style for me. I felt that she was no always prepared and the last chapters felt rushed.

Examples need to be worked out initialy to understand material. Not just explain them.

N/A

when teaching the class about example, explain more.

Overall great course. Loved how the reasoning was explained instead of just showing you how to put it in a calculator or computer system.
