Summary: (12 points)

The purpose of the Review Article Assignment is to practice your research and writing skills. Throughout the class, we will cover various health topics that may be of interest to you. So, you can use these research review article assignments to increase your knowledge of those topics. These articles should be Peer Reviewed Journal Articles. To research these articles, you should use the RMCC website and click on library. Academic Search Elite is the best source in my opinion. The review of the article should be submitted in the format that you are currently viewing. Please choose a font that is legible and format it currently. The review should be in paragraph form. Grammar, punctuation, formatting, etc. does count in the grade. If you do not give me the citation below, it is an automatic zero, because I can't go and view the article to know if you actually read the article and didn't copy/paste. If you have any further questions, please let me know.
