Name 3 things that you learned in this class that you think you can use when you start teaching.

6 responses

Learning what technologies are easier to navigate through. Learning how to create a gradebook. Learning how to create a lesson plan.

How to use google sites, how to make a lesson plan, and finally how to use zoom to make online recordings for kids that are absent.

How to create Google Sites, Kahoot, and a lesson plan.

How to create a Google Site. How to create and go through with a lesson plan. How to make a grade book.

I could use all the knowledge I have gathered about the different technologies. Another thing I will use is to make quizzes on Kahoot and quizzes. I would also be able to make a newspaper article if needed.

How to make a lesson plan, useful technologies, and presentation skills.

Is there anything that you think should not be included in next year's class?

6 responses

No

Next year, you should have them create a Nearpod as another interactive thing they could do with their future students.

This class was great, all up to date and effective. Screencast was hard to use, and Genial.ly was my least favorite.

No, I think everything we learned this year was beneficial.

I would not include making a poster on Canva.

There is nothing that I think shouldn't be included however, I think it is important to tell high school students that you will need another computer to do your work.

Which of the following should continue to be taught in this class? (You may check as many as you like.)

Copy

What did you like the most about this class?

6 responses

Everything due Sunday at midnight.

Something that I liked most about this class was that all of the assignments were due on Sunday.

Everything was always interesting to me, but I loved the Book Creator the most.

The flexibility and how personalized I could make every assignment. It felt like I had my mini classroom.

I like being able to test out all the technology and doing a technology review.

That the work is due on Sunday so I have time outside of school.
