BIOL2211-01/IN01

Human Physiology Lab

Spring 2023

Lecture: T&F 8:00am – 9:15am in OC; **Lab**: F 9:30-11:30am in Spencer 229
INSTRUCTOR: Dr Adam Gunn, PT, DPT & Fran Nault
OFFICE: Lecture 247
OFFICE HOURS: Available as needed via email or pre-arranged on campus meeting
EMAIL: agunn@uarichmountain.edu

PREREQUISITES for this course are successful completion Human Anatomy course or instructor permission.

RESOURCES:
Laboratory Manual: *Laboratory Manual for Hole's Human Anatomy and Physiology* 16th (Cat and Fetal Pig version); Martin. ISBN: 1264262868
Optional-** *Netter's Anatomy Coloring Book Updated Edition (Netter Basic Science)* 2nd Edition ISBN-10: 0323545033
Course CONNECT: https://connect.mheducation.com/class/a-gunn-in01

COREQUISITES: Enrollment in Human Physiology BIO-2213 is also required

COURSE DESCRIPTION: The lab course will use a "hands on" approach, with an emphasis on integrated structure-function relationships at the tissue, organ, organ system, and organismal level. The laboratory materials will include a microscope slide library of human/animal tissues, animal tissue for dissection, palpation, auscultation, drawings, skeletons, clinical tests, models, and video film clips of human cadaver dissections. This course provides the foundation for the lab/clinical topics covered by requiring identification using anatomical nomenclature, proper laboratory/microscopy techniques, and problem-solving skills for the following systems: endocrine, cardiovascular, lymphatic, immune, digestive, respiratory, urinary, reproductive systems, including fluid and electrolyte balance; and acid-base balance. Lecture is an integral co-requisite for this course and participation is required for successful completion of this course. This course is a co-requisite for Human Physiology lecture

Face Mask Policy: As per the direction of the University of Arkansas Board of Trustees, all students are required to wear a proper face covering that completely covers the nose and mouth while on campus and in class. Masks with holes or masks that do not completely cover nose and mouth are not acceptable. Any student that does not have a proper mask will leave class and be referred to the Vice Chancellor for Student Affairs for possible disciplinary action.

Food and Drink: Food and drinks, including water are not allowed in the laboratory at any time.

Program outcome and rationale: The knowledge and critical thinking skills acquired in the general education component enable students to analyze problems, arrive at intelligent conclusions, and make reasoned choices in their professional and personal lives. This course provides a basic, yet comprehensive, knowledge of the human body for any and all medical purposes: to familiarize students with the organization of the human body, to develop an understanding of the functions of the organ systems including pathologies (diseases) that affect these systems.

COURSE OBJECTIVES: Upon completion of this course, the student will be able to:

1. Be able to effectively utilize anatomic terminology including use of appropriate relative anatomical terms as it relates to regions, directions, body planes, and cavities of the body.
2. Understand specific examples of homeostasis and how it is controlled in the human body.
3. Understand basic physiology and pertinent anatomy for the following human body systems: skeletal, integumentary, muscular, and nervous.
4. Be able to use microscopes, lab equipment, and computer technology to research information on human physiology.
5. Competently use clinical and laboratory equipment such as a stethoscopes, pulse oximeter, incentive spirometer, and syphgmomanometer.
6. Proficiently take vital signs and apply your knowledge of human physiology using applicable clinical tests/skills demonstrated
7. Analyze and interpret the basics of EKG/ECG strips and understand information related to physiological pathologies
8. Clinically apply an understanding of human physiology to realistic scenarios, case problems, and/or pathologic illnesses altering normal physiology.
9. Attain a basic understanding of the structures and relationships of the human body, and be able to use this information in a medical career or other biological discipline.

TENTATIVE LAB SCHEDULE

Date	Topic	Exercise
Jan. 20	**Endocrine System**	**(handout provided)**
Jan. 27	**Blood Cells and Blood Typing**	**37**
Feb. 3	**Heart Structure (dissection)** **Cardiac Cycle**	**38** **39**
Feb. 10	**EKG/ECG analysis** **Auscultation of cardiovascular system**	**(handout provided)**
Feb. 17	**Vital signs** **Clinical assessment: palpation, tests, and measures**	**(handout provided)**
Feb. 24	**Respiratory Organs** **Breathing and Respiratory Volumes and Capacities**	**45** **46**
March 3	**Respiratory ventilation** **Spirometry** **Auscultation of pulmonary system**	**(handout provided)**
March 10	**Lymphatic & Immune System**	**(handout provided)**
March 17	**Lab Practical EXAM**	**37-42**
March 24	****Spring Break**	

March 31	**Digestive Organs**	**43**
April 7	**Urinary Organs** **Urinalysis**	**48** **49**
April 14	**Lab Practical EXAM**	**43-49**
April 21	**Fetal pig Dissection:** **Cardiovascular, Respiratory, and Urinary**	**55, 56, 57, 58**
April 28	**Group(s) 1-4 clinical case presentation**	
May 5	**Group(s) 5-8 clinical case presentation**	

LABORATORY CONDUCT: To prevent the spread of pathogens, a ***clean technique*** will be used while handling all models/specimens/palpations in the lab. The laboratory consists of a series of hands-on exercises that are designed to reinforce some of the principles learned in class. Lab exercises are assigned beforehand and it is expected that you read the material BEFORE coming to class. You are expected to study and review models, materials, and organisms provided in lab as well as the A&P Revealed application in CONNECT. **Inappropriate comments and/or behavior during labs will not be tolerated!**

ONLINE LABORATORY STUDENTS: Lab assignments and practical exams will be conducted online through Connect modules/exams, and/or through completed written lab manual assignments. Dissection and Case Presentation points will be made up through provided online case studies and exams through Connect.
IF YOU ARE NOT LISTED ON THE CONNECT ONLINE ROSTER BY JANUARY 28TH, YOU WILL BE DROPPED FROM THE CLASS FOR NON-PARTICIPATION

NOTE: IN THE EVENT OF CLASS/CAMPUS TRANSITION TO ONLINE STUDY, ALL LABORATORY ASSIGNMENTS AND EXAMS WILL BE ONLINE THROUGH BLACKBOARD AND/OR CONNECT

UARM CREDIT HOUR CALCULATOR: For every course credit hour, you should expect to spend at least three clock hours per week of concentrated attention on course-related work, including but not limited to time attending class, as well as out-of-class time spent reading, reviewing, organizing notes, preparing for upcoming quizzes/exams, problem solving, developing and completing homework, and other activities that enhance learning. For a three hour course, a typical student should expect to spend at least nine hours per week dedicated to the course. This includes the time spent in class.

COURSE REQUIREMENTS: Students are required to ***READ*** the material in the laboratory manual and ***take notes*** over the lectured information and handouts. It is advisable to read at least 5 pages in the

assigned chapter daily). If you wait until the day before the test to read the chapter, study the notes, and learn the vocabulary, you will not do well on the practical exams

LABORAORY COURSE EVALUATION: Student performance in the course will be based on the following factors:

Quizzes:	5-10 @ 10 points each	=	50-100 points
Dissections	2 @ 50 points each	=	100 points
Clinical case presentation	1@ 100 points	=	100 points
Lab Practical Exams	2 @ 50 points	=	100 points
TOTAL POINTS POSSIBLE		**=**	**400-450 points ****

GRADING SCALE:

A = 100 - 90%
B = 89 - 80%
C = 79 - 70%
D = 69 - 60%
F = 59% or lower

LAB QUIZZES – Approximately 5-10 quizzes will be given throughout the semester during lecture and/or laboratory periods. The quizzes will consist of questions related to laboratory exercises performed, assigned readings, and related lecture information.

CLINICAL CASE PRESENTATIONS – Laboratory groups of (3-4 people) from each table will receive a clinical case with a medical diagnosis relevant to systems discussed in Human Physiology (ex. Grave's disease, Diabetes, Heart Failure, COPD, chronic kidney disease, etc). Each group will answer questions given with their respective case and present these findings during lab using a PowerPoint presentation.
Following each presentation, a discussion panel will occur with questions asked by peers and the instructor. Grading will be based on overall presentation and participation. A separate rubric will be given along with each clinical case.

LAB PRACTICAL EXAM – Laboratory Practical's are in-class examinations, in which students are given equipment, materials, and samples from previous laboratory exercises and asked to individually answer questions about them.

ATTENDANCE REQUIREMENTS: As a student, you are responsible for all material presented during lecture, whether present for the class or not. Assignments are to be completed in a timely fashion. Unexcused absences are not to exceed twice what the class meets in a week. Laboratory is a required part of this course and failure to attend or participate **will** result in an "F" for this course. For further information, see "Student Attendance" on page 70 of the 2017/2018 UARM Academic Catalog.

> **Make-up Policy:** A student who misses an assignment because of an officially sanctioned college activity or those with a documented excuse for their absence, will be permitted to make up the assignment or test without penalty. Any deviation from this policy will be considered on a case-by-case basis.

Academic Dishonesty: Instances of academic dishonesty, *i.e., "cheating,"* will be dealt with in accordance with those policies outlined in the current UARM Student Handbook.

Cellphone usage policy: Use of personal cell phones in class is prohibited **unless it is an emergency.** Failure to abide by policy results in a *verbal warning* upon first offense, and *10 point deduction* in grade with each additional offense after a verbal warning has been given. **Please make sure that your cell phone and any other electronic devices are turned off (or to silent mode) during the class session**.

Additional Information: Food and drinks are not permitted in this class.

Disability Policy: It is the policy of UARM to accommodate students with disabilities, pursuant to state and federal law. Any student with a disability who needs accommodations should contact the Vice President for Student Affairs Office, 394-7622 ext.1400.

Title IX and Discrimination Policy: UA Rich Mountain adheres to a policy that enables all individuals regardless of race, color, gender, national origin, age, religion, sexual orientation, veteran's status, or disability, to work and study in an environment unfettered by discriminatory behavior or acts. Harassment of an individual or group will not be condoned, and any person (student, faculty, of staff member) who violates this policy will be subject to disciplinary action.

Harassment that is considered discriminatory includes actions or conduct (verbal, graphic, gestural, or written) directed against any person or group with the intent to demean or create a hostile or threatening environment. It is not the intent of this policy to infringe upon or limit educational, scholarly, or artistic expression. Any person who believes he or she has been discriminated against should contact the Title IX Coordinator to obtain assistance and information concerning the filing of a complaint.

Face mask policy: Students are encouraged but not required to wear face masks in class and public spaces.

Attendance Policy: For attendance purposes, a student who is displaying symptoms of illness must email: contact.tracing@uarichmountain.edu to determine next steps for an excused absence related to COVID or flu. Contacting an instructor **DOES NOT** start this process or guarantee an excused absence.
Arkansas Clean Air Act: In compliance with the Arkansas Clean Air Act, UARM is a smoke and tobacco free facility. Students and guests are to refrain from the use of all tobacco products while on campus.

Student Misconduct: Students committing misconduct are subject to disciplinary sanction(s) and or restrictions. Misconduct or prohibited behavior includes, but is not limited to endangerment, harassment, disruption, sexual misconduct, dishonesty, illegal drugs and/or alcohol, fire or safety issues, gambling, property violations, computer violations or other violations as listed in detail in the UARM catalog.

UARM Mission: University of Arkansas Rich Mountain provides transformative education to all learners.

Campus Security: UA Rich Mountain strives to provide a safe learning environment; therefore, students who know of any security risk are asked to contact a college official.
