KNath BIOL1543-01

Any additional comments about the course or instruction?

Super nice instructor, just difficult to follow sometimes.

Thank you for all of your support, Dr. Nath.

I feel that this course would have went smoother if it were not for the snow days.

a lot of the in person labs were kinda hodpoge and it wasn't really effective, the online labs worked better for me.

why are we doing in person labs as well as online labs.
