KNath

Any additional comments about the course or instruction?

Most of it was stuff I already knew. He just refreshed my memory or expanded on the topics.

Course content is relevant, but it's hard to pay attention. I think a more interactive teaching style would help with this.

Dr. Nath was very passionate, but I could rarely understand what he was saying. He also had serious difficulty with the online/blackboard parts of the course, and it was very confusing to us students.

no.

N/A

I struggle understanding the lectures due to the fact I can't understand you.
